SUMMARY

Dedicated and results-driven IT professional with hands-on experience managing government data center infrastructure, enterprise server environments, and multi-VM network operations. Currently serving as System Administrator at the Ministry of State Administration (MAE) of Timor-Leste, responsible for the full lifecycle of VMware vSphere virtualization environments, network services, monitoring systems, and mission-critical government applications. Proven ability to implement robust monitoring solutions, respond to complex system incidents, and produce structured technical documentation. Strong troubleshooting skills, fast learner, and committed to maintaining secure and reliable IT infrastructure.

EDUCATION

2019 - 2023 **Bachelor of Engineering in Computer Science**
Dili Institute of Technology

EXPERIENCE

Jan 2023 - Mar 2023 **Field Technician & IT Support (Intern)**
Metrolink, Lda

- Assisted with network installation and maintenance.
- Participated in field deployment and testing of fiber and LAN networks.

Jan 2024 - Present **System Administrator – (Internal IT Role)**
Ministry of State Administration (ESTATAL)

Responsibilities:

- Deployed and managed Linux servers (Rocky Linux & Alma Linux) for internal systems
- Installed and managed VMWare vSphere for virtualization
- Created and maintained Virtual Machines (VMs) for internal services
- Configured Nginx, PHP, and MariaDB for web applications
- Managed user access and server permissions
- Configured SSH secure access and firewall (firewalld)
- Performed troubleshooting for network connectivity issues
- Designed and deployed a Netdata monitoring stack with a centralized parent VM aggregating metrics from multiple child VMs, with dashboards displayed on an office TV screen for real-time visibility.
- Established Webmin clustering with a master-slave configuration for centralized server management across the data center.
- Supported LAN infrastructure and basic network configuration
- Assisted in planning IT infrastructure improvements
- Maintained system documentation and deployment SOP

TECHNICAL SKILLS

Server Administration

- Linux Server Administration (Rocky Linux / Alma Linux)
 - Windows Server
 - User & permission management
 - SSH configuration
 - Firewall configuration (firewalld)
 - Snapshots & Storage
-

Virtualization

- VMware vSphere installation & management
 - VM deployment & resource allocation
-

Networking

- LAN configuration
 - IP Addressing & Subnetting
 - DHCP & Static IP configuration
 - NAT & Basic routing
 - Network troubleshooting
-

Web & Application Infrastructure

- Nginx Web Server
 - MariaDB / MySQL
 - PHP configuration
 - Laravel deployment
 - Django
 - Git & GitHub
 - Docker Swarm
 - CapRover
-

Monitoring & Management

- NetData
 - Webmin Clustering
 - Cockpit
 - System Performance Tuning
-

Security

- Non-root user with sudo configuration
- SSH hardening
- Basic understanding of VPN and firewall concepts

CERTIFICATIONS / TRAINING

Technical Courses

- Learn Linux from Scratch+ – ID-Networkers (Jul 2025)
- Practical Windows Server: Active Directory, File Sharing & Remote Access – IDNetworkers (Apr 2025)
- Basic Computer Networking – ID-Networkers (Apr 2025)
- Basic Cisco – ID-Networkers (Jul 2025)

Appreciation & Seminars

- Internship at Metrolink, Lda – Mar 2023
- NTT Cisco Tech Seminar: The Future of Connectedness – Jun 2024
- NTT Tech Guru Seminar: Navigating the Future of GenAI – Mar 2025

Training Self-Lab Practice

- Self-learning in Linux Server Administration
- Laravel Deployment Training
- Network & System Administration Self-Lab Practice
- Currently building home lab environment for infrastructure practice

LANGUAGES

- Tetum (Fluent)
- Bahasa Indonesia (Fluent)
- English (Intermediate)
- Portugues (Basic)

PERSONAL STRENGTHS

- Strong analytical thinking
- Fast learner
- Able to work under pressure
- Responsible and disciplined
- High integrity and confidentiality awareness
